

**PERMANENT DELEGATION OF BRAZIL TO THE
INTERNATIONAL CIVIL AVIATION ORGANIZATION**

Verbal Note No.: NV2022-465 / BRASICAO

The Permanent Delegation of Brazil to the International Civil Aviation Organization presents its compliments to the Air Transport Bureau – Environmental Branch and has the honour to make the following declarations regarding operative paragraph 20 of the Assembly Resolution A41-22 – “Consolidated statement of continuing ICAO policies and practices related to environmental protection – Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA)”:

In line with Note Verbale No. NV2019-082/BRASICAO, dated October 17, 2019, and Note Verbale No. NV2016-078/BRASICAO, dated November 6, 2016, the Government of Brazil declares its understanding that emissions units generated through multilaterally-agreed mechanisms established under the United Nations Framework Convention on Climate Change (UNFCCC), namely the Clean Development Mechanism of the Kyoto Protocol and the mechanism established by Article 6, paragraph 4 of the Paris Agreement, are already eligible for CORSIA. Brazil understands, furthermore, that any exceptions to this general guideline should be carefully measured and explained, so as to avoid internal inconsistencies and unpredictability in the system as a whole.

The Permanent Delegation of Brazil avails itself of this opportunity to renew to the International Civil Aviation Organization the assurance of its highest consideration.
