Effects of Novel Coronavirus (COVID-19) on Civil Aviation: Economic Impact Analysis

Montréal, Canada

11 March 2020

- Introduction and Background
- Scenario Analysis: **Mainland China**
- Scenario Analysis: **Hong Kong SAR of China and Macao SAR of China**
- Summary of Scenario Analysis and Additional Estimates: **China**
- Scenario Analysis: **Republic of Korea**
- Scenario Analysis: **Italy**
- Scenario Analysis: **Iran (Islamic Republic of)**
- Preliminary Analysis: **Japan** and **Singapore**

Estimated impact of COVID-19 outbreak on scheduled **international passenger** traffic during **1Q 2020** compared to originally-planned:

- **China (including Hong Kong/Macao SARs):** 42 to 43% seat capacity reduction, 24.8 to 28.1 million passenger reduction, USD 6.0 to 6.9 billion loss of gross operating revenues of airlines
- **Republic of Korea:** 27% seat capacity reduction, 6.1 to 6.6 million passenger reduction, USD 1.3 to 1.4 billion loss of gross operating revenues of airlines
- **Italy:** 19% seat capacity reduction, 4.8 to 5.4 million passenger reduction, USD 0.6 to 0.7 billion loss of gross operating revenues of airlines
- **Iran (Islamic Republic of):** 25% seat capacity reduction, 580,000 to 630,000 passenger reduction, USD 92 to 100 million loss of gross operating revenues of airlines

* *Coronavirus Disease 2019 (COVID-19) Situation Report by WHO*

Global capacity share of 4 States dropped from 23% in January to 9% in March 2020

- Number of seats offer by airlines for scheduled international passenger traffic;
- 4 States combined with the exclusion of route overlaps

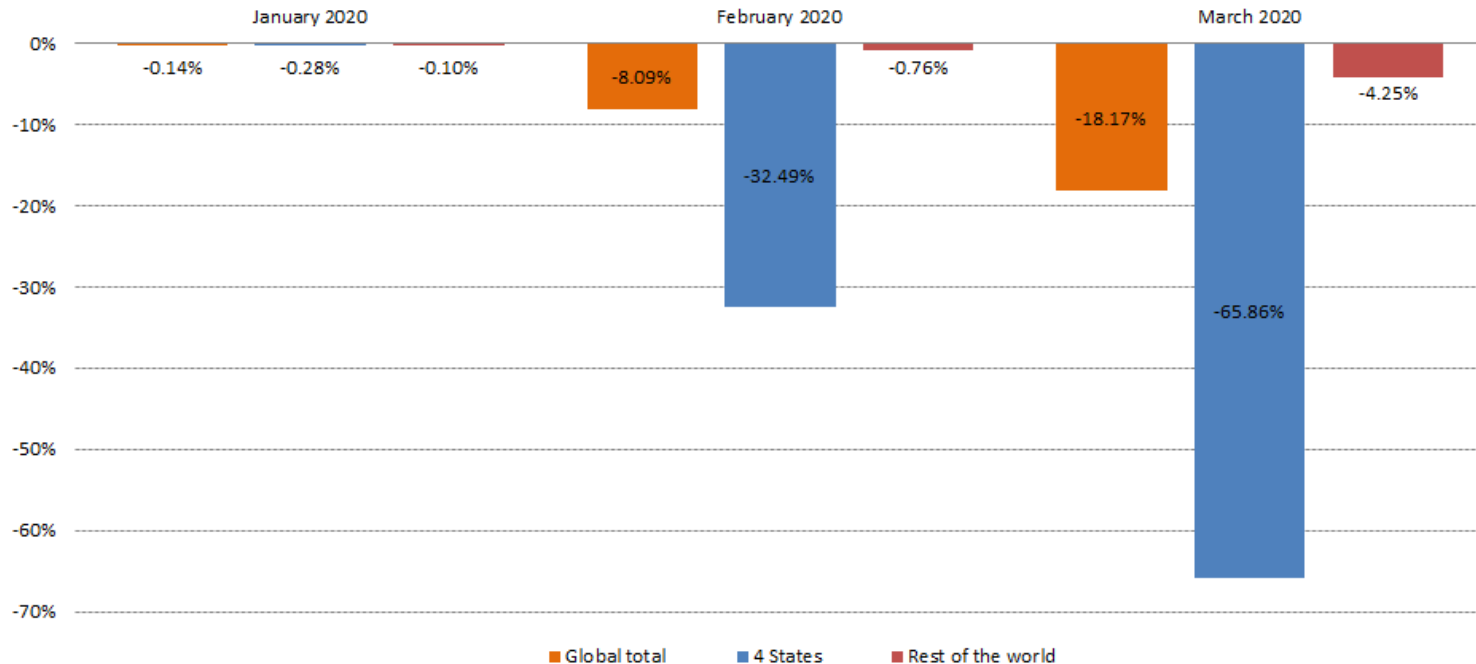

ICAO

UNITING AVIATION

4 States have represented a significant portion of international capacity reduction in 1Q 2020

Reduction of international passenger seat capacity from originally-planned

ICAO

UNITING AVIATION

Introduction and Background

ICAO

UNITING AVIATION

Air traffic has been vulnerable to external factors including disease outbreaks

What can we learn from past experience? SARS, Aviation flu and MERS

Impact of past outbreaks on aviation

History shows that SARS has the most serious impact on traffic. At the height of the outbreak (May 2003), monthly RPKs of Asia-Pacific airlines were 35% lower than their pre-crisis levels. Overall in 2003, Asia-Pacific airlines lost **8% of annual RPKs** and **\$6 billion of revenues**.

Flight cancellation has exceeded actual operations since 31 January 2020

Note: The above includes a) international from mainland China, Hong Kong SAR of China, Macao SAR of China, Taiwan, Province of China; b) domestic within mainland China, and c) regional between mainland China and Hong Kong SAR, Macao SAR and Taiwan Province

Scenario Analysis: Mainland China

This is a preliminary analysis. Figures and estimates herein will be updated with the situation evolving and more information available.

- **“International”** refers to scheduled international passenger services from/to mainland China excluding:
 - scheduled passenger services between mainland China and Hong Kong Special Administrative Region (SAR) of China, Macao SAR of China and Taiwan, Province of China; and
 - scheduled international passenger services from/to Hong Kong SAR, Macao SAR of China and Taiwan, Province of China
- **“Regional”** refers to scheduled passenger services:
 - between mainland China and Hong Kong SAR of China
 - between mainland China and Macao SAR of China; and
 - between mainland China and Taiwan, Province of China

Number of seats offered by airlines (monthly, 2019)

Capacity share 2019

- 45%: International by Chinese carriers
- 37%: International by foreign carriers
- 9% Regional (mainland China - Hong Kong SAR)
- 3% Regional (mainland China - Macao SAR)
- 7% Regional (mainland China - Taiwan Province)

Baseline: 10% seat capacity increase compared to 1Q 2019

A total of YoY 10% seat capacity increase originally - planned for 1Q 2020 despite the reduction of capacity between mainland China and Hong Kong SAR and Taiwan Province

Scenarios 1 & 2: 46% seat capacity reduction from Baseline

Scenario 1: for 1Q 2020 a total of 40% reduction compared to 1Q 2019 and 46% reduction from Baseline

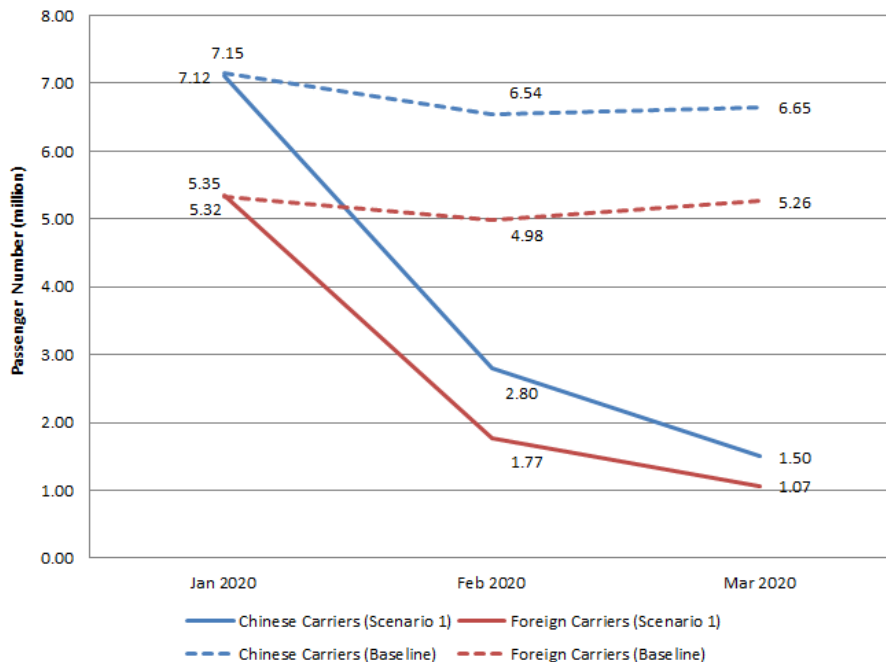

Scenario 2: for 1Q 2020 a total of 41% reduction compared to 1Q 2019 and 46% reduction from Baseline

16.3 to 18.0 million “international” passenger reduction in 1Q 2020 compared to Baseline

Scenario 1

16.3 million passenger reduction

Scenario 2

18.0 million passenger reduction

3.4 to 3.7 million “regional” passenger reduction in 1Q 2020 compared to Baseline

Scenario 1
3.4 million passenger reduction

Scenario 2
3.7 million passenger reduction

Approx. USD 4.8 to 5.3 billion potential loss of airline revenues for 1Q 2020 compared to Baseline

Scenario 1: USD 4.8 billion reduction

Scenario 2: USD 5.3 billion reduction

- International (Chinese carriers)
- International (Foreign carriers)
- Regional (Mainland - Hong Kong SAR)
- Regional (Mainland - Macao SAR)
- Regional (Mainland - Taiwan Province)

- International (Chinese carriers): calculated with an average fare of USD 250 per passenger based on traffic/financial reports of CA, CZ and MU;
- International (Foreign carriers): assumed 15% higher average fare than Chinese carriers;
- Regional: calculated with an average fare of USD 135 per passenger based on traffic/financial reports of CA, CZ and MU

The preliminary estimates indicate the impact in terms of scheduled international passenger traffic from/to mainland China (including between mainland China and Hong Kong SAR of China, Macao SAR of China and Taiwan, Province of China) during 1Q 2020 compared to originally-planned:

- Overall reduction of **46% of seats offered by airlines**
- Overall reduction of **19.7 to 21.7 million passengers**
- Approx. **USD 4.8 to 5.3 billion potential loss** of gross operating revenues of airlines

Scope of analysis	Estimated Impact on									
	Number of seats offered by airlines (000)				Number of passengers (000)				Gross operating revenues of airlines (USD, million)	
	Scenario 1		Scenario 2		Scenario 1		Scenario 2		Scenario 1	Scenario 2

Summary of Scenario Analysis: China + Additional Estimates

This is a preliminary analysis. Figures and estimates herein will be updated with the situation evolving and more information available.

- The direct impact of COVID-19 outbreak is expected to be greater than that caused by SARS in 2003 due to higher scale of flight cancellations and bigger economic size/air travel market of China
- The preliminary estimates indicate the impact in terms of scheduled international passenger traffic from/to China (including Hong Kong SAR of China, Macao SAR of China and cross-strait services from/to Taiwan, Province of China) during 1Q 2020 compared to originally-planned:
 - Overall reduction ranging from **42% to 43% of seats offered by airlines**
 - Overall reduction of **24.8 to 28.1 million passengers**
 - Approx. **USD 6.0 to 6.9 billion potential loss** of gross operating revenues of airlines
- The above estimates exclude, inter alia, the impact of traffic reduction related to air cargo, Chinese domestic, as well as other international services

Break-down of revenue reduction by region of air carrier registration in 1Q 2020

55% and 87% of revenue reduction is estimated to be attributed to the loss from Chinese carriers and Asia/Pacific carriers (including Chinese carriers), respectively

Break-down of estimated impact in 1Q 2020

Scope of analysis	Estimated Impact on									
	Number of seats offered by airlines (000)				Number of passengers (000)				Gross operating revenues of airlines (USD, million)

Domestic passenger services in mainland China in 1Q 2020

The preliminary estimates indicate the impact in terms of scheduled domestic passenger traffic within mainland China during 1Q 2020 compared to originally-planned:

- Overall reduction of **40% of seats offered by airlines**
- Overall reduction of **66.6 to 75.8 million passengers**
- Approx. **USD 6.7 to 7.6 billion potential loss** of gross operating revenues of airlines

		Estimated Impact on											
		Number of seats offered by airlines (000)				Number of passengers (000)				Gross operating revenues of airlines (USD, million)			
Scope of analysis		Scenario 1		Scenario 2		Scenario 1		Scenario 2		Scenario 1		Scenario 2	
Domestic within mainland China		-76,100	-40%	-76,100	-40%	-66,600	-42%	-75,800	-48%	-\$6,460		-\$7,774	
Assumption		Seat capacity is reduced by 3% in January 2020 and 60% in February and March 2020 from the originally-planned schedules (baseline)				Load factor is down from 83% (baseline) to 80% for 1Q 2020		Load factor is down from 83% (baseline) to 80% in January 2020, 58% in February 2020 and 65% in March 2020		Calculated with an average fare of USD 97 per passenger based on CANNNews.com.cn estimates		Calculated with an average fare of USD 102.5 per passenger based on traffic/financial reports of CA, CZ and MU

	Loss	-	-	-945,723	-917.35	-1,182,894	-1147.41
United States		888,102	861.46	505,096	489.94	446,707	433.31
	Loss	-	-	-383,006	-371.52	-441,395	-428.15

- Data excludes Special Administrative Regions (SAR) of China (Hong Kong SAR and Macao SAR) and Taiwan, Province of China
- Calculated with average international tourism spending of China (USD 970) per tourist reported by UNWTO

Scenario Analysis: Republic of Korea

This is a preliminary analysis. Figures and estimates herein will be updated with the situation evolving and more information available.

- Scope: scheduled international passenger services from/to Republic of Korea
- Baseline (hypothetical situation without COVID-19 outbreak)*
 - Seat capacity: used "originally-planned" winter schedule
 - Load factor: 80%
- Scenario 1 (mild)*
 - Seat capacity: estimated by airlines' schedule changes
 - Load factor: used the same percentage as Baseline
- Scenario 2 (severe)*
 - Seat capacity: estimated by airlines' schedule changes
 - Load factor: 10 percentage points lower in March (i.e. 70%)

*** Between Republic of Korea and China, Hong Kong SAR and Macao SAR of China:**
extracted the impacts involving Korea from the respective scenarios of China and Hong Kong/Macao SARs

27% seat capacity reduction in 1Q 2020 from Baseline

6.1 to 6.6 million passenger reduction in 1Q 2020 compared to Baseline

Scenario 1: a total of 6.1 million passenger reduction for 1Q 2020 from Baseline

Scenario 2: a total of 6.6 million passenger reduction for 1Q 2020 from Baseline

ICAO

UNITING AVIATION

Approx. USD 1.3 to 1.4 billion potential loss of airline revenues for 1Q 2020 compared to Baseline

Scenario 1: USD 1.3 billion reduction

Scenario 2: USD 1.4 billion reduction

- Between Korea and China including Hon Kong/Macao SARs
- Between Korea and other international destinations (Korean carriers)
- Between Korea and other international destinations (Foreign carriers)

- Between Korea and China including Hong Kong SAR: extracted the impact involving Korea from scenarios 1 and 2 of China;
- Other internal destinations: Other internal destinations: calculated with an average fare of USD 287.6 per passenger (ranging from USD 155 to 485 by destination)

Scenario Analysis: Italy

This is a preliminary analysis. Figures and estimates herein will be updated with the situation evolving and more information available.

- Scope: scheduled international passenger services from/to Italy
- Baseline (hypothetical situation without COVID-19 outbreak)*
 - Seat capacity: used "originally-planned" winter schedule
 - Load factor: 80%
- Scenario 1 (mild)*
 - Seat capacity: estimated by airlines' schedule changes
 - Load factor: used the same percentage as Baseline
- Scenario 2 (severe)*
 - Seat capacity: estimated by airlines' schedule changes
 - Load factor: 10 percentage points lower in March (i.e. 70%)

*** Between Italy and China, Hong Kong SAR of China, as well as Republic of Korea:** extracted the impacts involving Italy from the respective scenarios of China, Hong Kong SAR and Korea

19% seat capacity reduction in 1Q 2020 from Baseline

COVID-19 has started to impact airline operations from late February 2020 (except China routes)

- Between Italy and China including Hong Kong SAR, Republic of Korea, and Iran (Islamic Republic of)
- Between Italy and other international destinations

4.8 to 5.4 million passenger reduction in 1Q 2020 compared to Baseline

Between Italy and China including Hong Kong SAR, Republic of Korea, and Iran (Islamic Republic of)

Between Italy and other international destinations

Approx. USD 0.6 to 0.7 billion potential loss of airline revenues for 1Q 2020 compared to Baseline

Scenario 1: USD 580 million reduction

Scenario 2: USD 660 million reduction

- Between Italy and China including Hong Kong SAR, Republic of Korea, and Iran (Islamic Republic of)
- Between Italy and other international destinations

- Between Italy and China, Hong Kong SAR and Macao SAR of China, as well as Republic of Korea: extracted the impacts involving Italy from the respective scenarios of China, Hong Kong/Macao SARs and Korea;
- Other internal destinations: calculated with an average fare of USD 287.6 per passenger (ranging from USD 60 to 485 by destination)

Scenario Analysis: Iran (Islamic Republic of)

This is a preliminary analysis. Figures and estimates herein will be updated with the situation evolving and more information available.

- Scope: scheduled international passenger services from/to Iran
- Baseline (hypothetical situation without COVID-19 outbreak)*
 - Seat capacity: used "originally-planned" winter schedule
 - Load factor: 80%
- Scenario 1 (mild)*
 - Seat capacity: estimated by airlines' schedule changes
 - Load factor: used the same percentage as Baseline
- Scenario 2 (severe)*
 - Seat capacity: estimated by airlines' schedule changes
 - Load factor: 10 percentage points lower in March (i.e. 70%)

*** Between Iran (Islamic Republic of) and China, as well as Italy:** extracted the impacts involving Iran from the respective scenarios of China and Italy

25% seat capacity reduction in 1Q 2020 from Baseline

580,000 to 630,000 passenger reduction in 1Q 2020 compared to Baseline

Between Iran and China, Italy

Between Iran and other international destinations

Approx. USD 92 to 100 million potential loss of airline revenues for 1Q 2020 compared to Baseline

Scenario 1: USD 92 million reduction

Scenario 2: USD 100 million reduction

■ Between Iran and China, Italy

■ Between Iran and other international destinations

- Between Italy and China, Italy: extracted the impacts involving Iran from the respective scenarios of China and Italy;
- Other internal destinations: calculated with an average fare of USD 140 per passenger (ranging from USD 105 to 370 by destination)

Preliminary Analysis: Japan and Singapore

This section contains a very preliminary analysis. Figures and estimates herein will be updated with the situation evolving and more information available.

Japan/Singapore reported the second highest confirmed cases till mid-February*

International passenger seat capacity
(Japan)

International passenger seat capacity
(Singapore)
